

stainless steel strainers

type: **K2 & K6**

The hygienic range of stainless steel pipeline strainers is ideal for applications where ease of cartridge removal and a robust construction are required.

They are designed to:

Prevent foreign bodies damaging or blocking process equipment, such as flow meters, valves and pumps;

Remove undesirable material, such as pips, fruit skins and gaskets;

Control the maximum size of solids and undissolved ingredients.

for purity of product

FEATURES

316L (1.4404) stainless steel

hygienic
- smooth surfaces
- no castings (no porosity), no crevices

quick to dis-assemble for cleaning and sterilising

robust design

right-angle or in-line (right-angle version featured)

filtering cartridges from 3mm to 0.07mm aperture or with 2mm or 3mm diameter holes

wedge wire cartridges available - ideal for back flushing applications

duplex - twin strainer arrangement available

APPLICATIONS

ideally suited for industries:

brewing
soft drinks
dairy
food
pharmaceutical

specification

material

All wetted parts are 316L (1.4404) stainless steel manufactured from solid bar
Materials certification can be provided

finish

Internal finish is 3 µmRA for the machined 'Uniform' finish and 0.8 µmRA for the 'Pure' finish
0.4 or 0.5 µmRA are available as options
External finish is machined

connections

Inlet and Outlet can be DIN11851, Tri-clamp, IDF, SMS, RJT, BSP or flanged
Other connections on request

seal

silicone elastomer
options include EP, viton, PTFE encapsulated

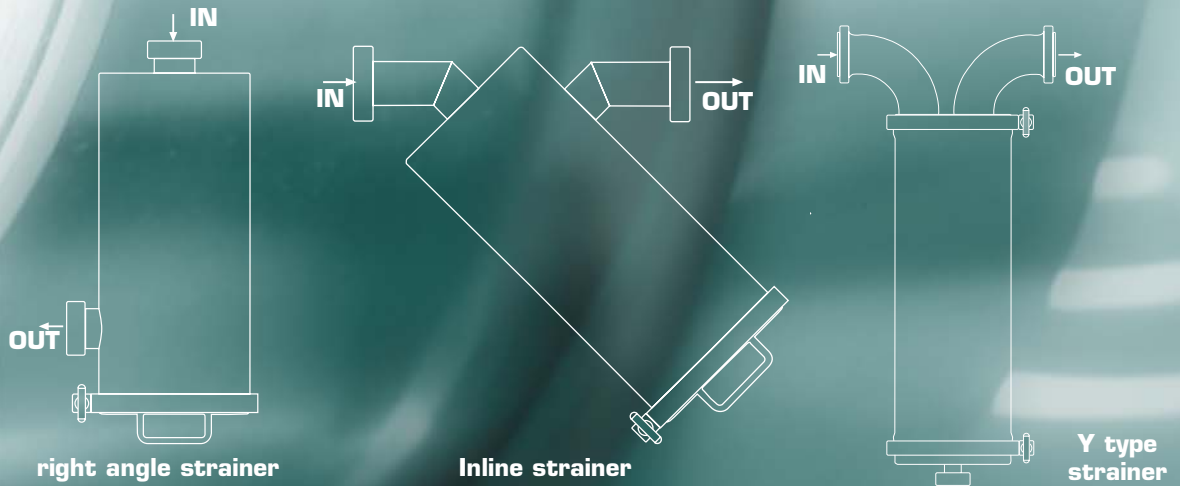

filter cartridges

mesh or wedge wire from 3mm to 0.07mm aperture or with 2mm or 3mm diameter holes

accessories

- duplex: a twin strainer arrangement with isolating valves, which allows one strainer to be cleaned at a time, without interrupting the flow
- drain valve
- bracketing or legs: for wall fixing or for free standing on the floor
